

Sensor Test Box

- Very easy to check sensor;
- Short/Open/Resistance Test;
- Phoenix fast Connector;
- LEMO FGG.1B.307 Connector;
- LEMO EGG.1B.307 Connector;
- Al. Alloy Case.

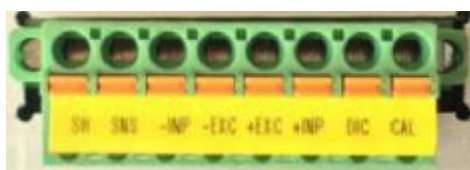

Sensor Test Box designs for crash test sensors quick test, which includes male connector in order to connect with DAS. The female connector can connect with sensors directly. All results can be measured during the sensor online. The Phoenix connector allows plug out and in, and can connect with wires of sensor or multimeter. By different connection, the online values, resistances of bridge or input/output, some wires short or open can be checked quickly.

LEMO Connector:

FGG.1B.307

EGG.1B.307

Phoenix Connector-8 pins

Pin Assignment: (or defined by customers)

1	CAL
2	DIC
3	+INP
4	+EXC
5	-EXC
6	-INP
7	SNS
SH	Shield

Dimension:

Length (mm)	85
Width (mm)	50
Height (mm)	20
